**AMENDMENTS TO THE CLAIMS:**

Claim 1 (amended): A removable game tray for baby walkers comprising:

a main tray including an upper cover and a lower cover which is fixedly mounted on said upper cover, the lower cover having two tongues at one side thereof and two rails at a bottom thereof, a handle slidably engaged with said rails and having a top protruded out of said lower cover when pushed into said lower cover; and

a receptacle having a recess configured to receive said main tray, said recess having an opening adapted to engage with said top of said handle, said recess being cut by two grooves to form two lugs, each of said lugs having a hole, said hole being adapted to receive a respective one of said tongues;

whereby said main tray can be easily removed from said receptacle by pressing said lugs.

Claim 2 (original): The removable game tray for baby walkers as claimed in claim 1, wherein said lower cover of said main tray is provided with a plurality of suckers.

Claim 3 (original): The removable game tray for baby walkers as claimed in claim 1, wherein said handle is provided with two hooks.

Claim 4 (original): The removable game tray for baby walkers as claimed in claim 1, wherein said recess of said receptacle is provided with a retractable spring which has a top extending out of said recess.
